

Why should I attend the Multiagency Course?

September 11th has reaffirmed that communication, cooperation, and information sharing within and among agencies are of paramount importance. During the Multiagency Course you will have the opportunity to network with intelligence analysts and law enforcement officers from your own area and from across the country. You will discuss local drug trends with other students and acquire insight into what is being seen in other parts of the country. Law enforcement officers will learn what analysts can do for them. Analysts will learn what law enforcement officers need. You will receive contact information for students from all sites so you can develop cooperative relationships.

Additionally, you will have the opportunity to learn from and interact with subject matter experts from federal agencies. We will provide contact information for all instructors in case you have questions after the class.

During the course week, you will be exposed to a broad spectrum of drug and intelligence topics and skills. This broad exposure will get you started in drug intelligence analysis and will help you identify the areas where you would like more in-depth training.

"Easy to understand material, great handouts, and hands-on practical exercises."
Local Intel Analyst

"Very good course! A lot of information presented in a short period of time; facilitators were great! Very knowledgeable!"
State Intel Analyst

Course Description

The Multiagency Course is an intensive, 1-week entry level drug intelligence analysis course. This introductory course provides an overview of counterdrug intelligence analysis, introduces students to basic analytical tools and techniques, and allows students to apply newly acquired skills to a “real world” scenario through a comprehensive final practical exercise.

The Multiagency Course is a cooperative effort by the Federal Bureau of Investigation, the Drug Enforcement Administration, the National Guard Bureau, the U.S. Customs Service, the Financial Crimes Enforcement Network, and the National Drug Intelligence Center. The National Drug Intelligence Center funds and coordinates the course.

Who Should Attend

Federal, state, and local law enforcement personnel (including active duty military and National Guard) who are interested in the basic skills of intelligence analysis should attend. The course is open to United States law enforcement personnel only.

“This course will definitely increase my job performance. I now have a better understanding of the value of intel info and this experience will definitely increase my awareness during intel collection efforts.”
Local Intel Analyst

Course Delivery

The Multiagency Course is delivered via interactive video teletraining (IVT) providing two-way audio and video links. This course is broadcast from the National Drug Intelligence Analyst Training Center in McLean, Virginia, to the receiving sites. Analyst facilitators are available at each site to assist students with course materials, questions, practical exercises, and the IVT technology. IVT is an economical alternative to traditional off-site training which requires travel and lodging costs.

Cost

Training materials are provided at no cost by the National Drug Intelligence Center. Students are responsible for all travel, lodging and per diem costs.

"Every class was interesting and informative."
Local Police Officer

"The final practical was good and helped to put all learned material together."
National Guardsman
